Personal Details

Highest Level of Education: Master's

Industry: IT Operations & Helpdesk

Work Experience

Freelance Designer

Digital dreams limited - Enugu

March 2021 to Present

I am a seasoned full-stack web developer with three years of hands-on experience. My journey is a testament to the relentless pursuit of knowledge and the ability to adapt in an industry where change is the only constant.

I've embarked on this journey into the world of web development with a passion for crafting digital experiences. Armed with a degree in computer science, I've dove headfirst into the realms of HTML, CSS, and JavaScript.

As the months rolled by, I felt the urge to explore the server-side of web development. I then delved into back-end technologies, experimenting with PHP and Laravel. Understanding the importance of data in web development, I became proficient in database design and management. I worked with a relational database, such as MySQL etc.

With experience came the ability to identify and solve complex problems efficiently. I then developed a knack for troubleshooting, debugging, and optimizing code.

Education

WASSSCE in Computer Science
